Continuing the Journey

Following our 30-year anniversary, Halo Design continues to evolve while remaining true to its roots: creating lighting that combines timeless Scandinavian aesthetics with everyday functionality.

This year, we have extended our ranges with new designs that explore fresh materials and finishes, always with the goal of achieving products that are not only beautiful, but also durable over time. From lightweight textiles to mouth-blown glass and refined metal details, every element has been carefully considered to bring warmth, character, and long-lasting quality to any interior.

Our philosophy remains the same: to design lighting that feels at home in both modern and classic spaces, striking a balance between innovation, craftsmanship, and simplicity. With these new additions, we are proud to continue shaping environments with light — one collection at a time.

Our values

Danish identity

Founded in 1994 by Danish entrepreneur Michael Waltersdorff at just 18 years old, Halo Design embodies the essence of Danish craftsmanship and innovation. We take pride in our heritage, which is reflected in the quality of our lamps.

Functionality

We design our lighting solutions with everyday life in mind, integrating practical features that make them not only beautiful but also useful. Our goal is to create lighting that adds value by improving how people interact with their spaces.

Nordic design

Rooted in Nordic traditions, our design philosophy blends classic elements with a modern touch. This approach ensures that our lighting solutions are timeless yet fresh, making them stand out in a global market.

Value for money

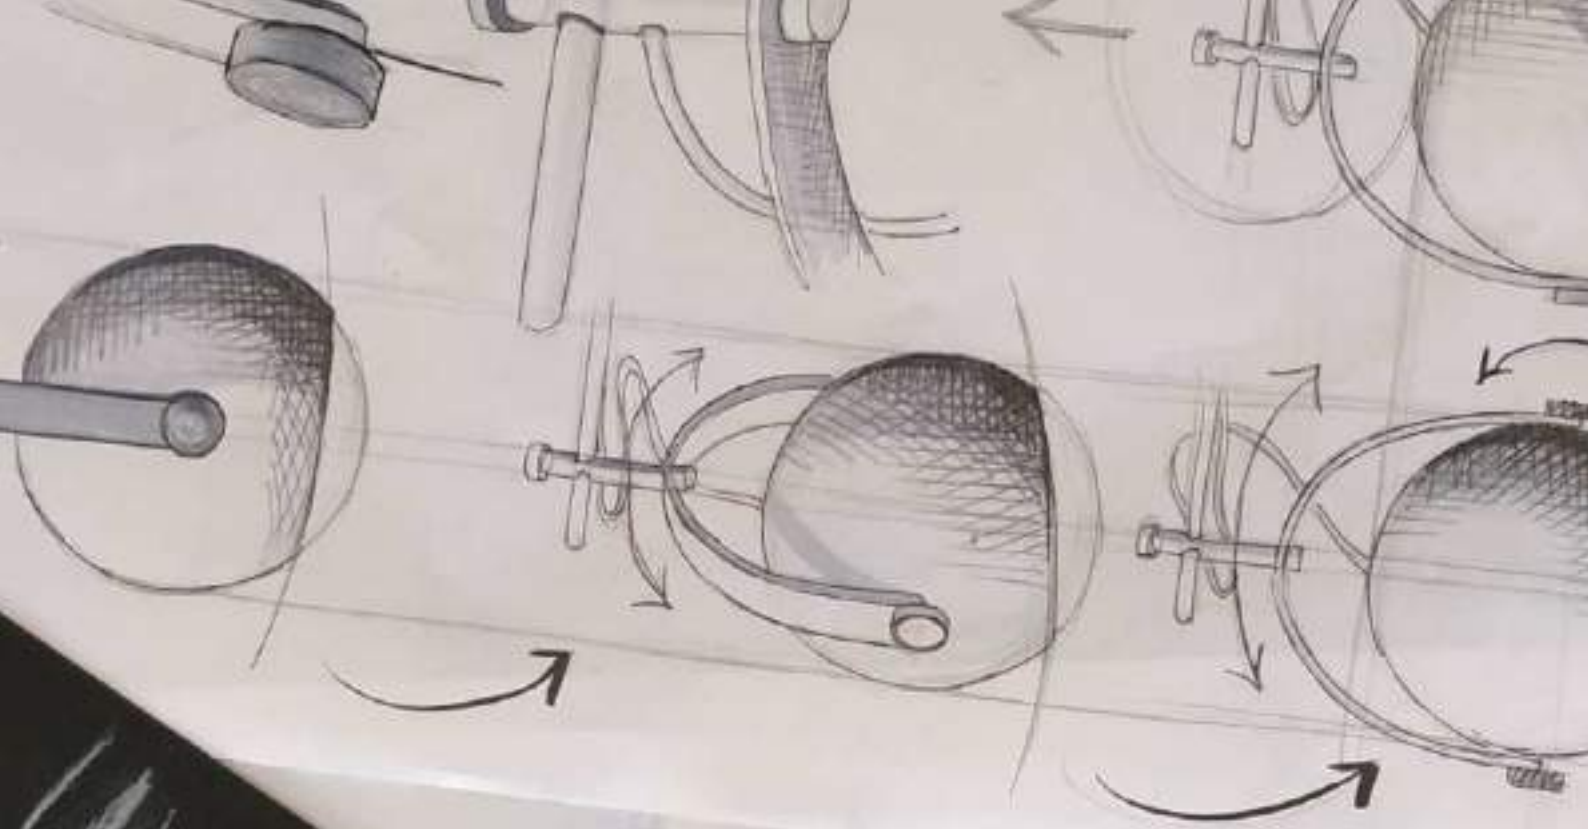

We believe that great design should be accessible. By balancing aesthetics with practicality, we deliver high-quality lighting at a price that offers true value. Our commitment is to make well-designed products available to a wide audience.

Lighting shapes how we perceive our surroundings and significantly impacts our mood. We believe that creating a positive and cozy atmosphere requires the right lighting to help people feel at ease.

Modern technology allows us to deliver customizable, energy-efficient lighting that can enhance emotional well-being. For this reason, our lamps are designed to be both functional and technically advanced, seamlessly integrating into any space to create a true sense of home.

The Collection

DC

A new take on a modern classic. The DC portable table lamp evolves from the original DC series, combining its iconic character with cordless flexibility. The head moves freely thanks to the elegant wooden arc, allowing intuitive light direction. Crafted in metal, wood, and brass details, the lamp balances form and function — ideal for indoor moments or outdoor evenings.

Room 49

This lamp series is the result of a close collaboration with interior designer Christian Bondo Gravesen and has led to the development of a complete range of products with very high build quality, excellent light distribution and refined brass details.

Designed by Emanuele Patton & Michael Waltersdorff

Candy

The Candy series features hand-blown glass shades in five soft, joyful hues — each with a delicate swirl texture that catches the light like spun sugar. Available as pendant, wall/ceiling, and table versions, Candy offers a versatile way to infuse interiors with charm, warmth, and a hint of nostalgia.

Paris Soft

Paris Soft builds on the success of the original Paris collection, reinterpreting its iconic pleated texture through a bold, geometric lens. The result is a calm, architectural presence — more sculptural, yet equally refined. While embracing a more contemporary silhouette, Paris Soft preserves the delicate materiality and inviting warmth of its predecessor.

Paris

Paris is truly one of those cities where fashion really happens, both in the streets and at home. For this new family of lamps we've taken inspiration from recent trends, where collections are being designed with pleats of dark and natural tones.

Designed by Emanuele Patton & Michael Waltersdorff with Caroline Bjørn

The lamps come with triangular plastic canopies in white or black.

Tilt

Dynamic by design. Tilt is a sculptural chandelier with integrated LED and a warm, ambient 2700K light. Thanks to its intuitive tilting frame, the light plane can be freely adjusted — allowing you to direct the glow exactly where it's needed. The 3-step dimming is controlled directly from your existing wall switch, making Tilt both visually striking and smartly functional.

Stockholm Nordic Edition

Aesthetic and material research results in the Stockholm family. With the new Nordic Edition lamps, we wanted to give them a natural look by combining wood with brass.

The lamps also have fine details such as a pivot point on the shade of the pendant models, which is useful for rotating and positioning the lamps as required.

DC

DC is a family of lamps with a simple and Scandinavian inspired design. Thanks to its round shapes and the combination of metal and wood, this range immediately became one of our classics. The veneered oak arch also has a very important function in rotating the shade of the lamps and directing the light freely. The details obtained from solid aluminium complete a unique design that is highly appreciated worldwide.

Drops

Icicles form when the conditions are right in winter, snow-covered trees and frozen water create the most beautiful drops, from which we drew inspiration for the Drops series in the Nineties. The unique result is thanks to the silky opal mouth blown glass, which is produced by one of the best glass factories in Europe.

Drops Metal

Inspired by its sibling (Drops in opal mouth blown glass) we challenged ourselves to make a classic, yet modern metal pendant. The result was a series of 4 metal wire pendants, with a unique lid in the bottom in brushed copper.

Baroni

With its beautiful white opal glass and details in brushed metal, the Baroni series is a true classic yet modern at the same time. The high quality of the glass makes sure to obtain a diffuse light that can illuminate in a very effective and decorative way. Baroni is available in various sizes and for different functions: as pendant, table lamp and floor lamp.

Atom

Halo Design's Atom series is inspired by the structure of atoms and their rotating electrons. An in-depth study of modern lighting needs has resulted in a unique collection of malleable lighting, where each lamp offers the ability to customize its appearance. In this way you can easily and comfortably create the most suitable version for your environment.

Wrong

Wrong has a curious look that is difficult to express in words. The shape of the mouth blown opal glass is asymmetrical and changes continuously depending on the point of view of the observer, giving the feeling of having several lamps in one. Definitely a family of lamps that must be seen in person to appreciate its aesthetic quality!

Bubbles

The apparently simple shape of the Bubbles lamps is actually a deep study of geometry, where proportions are balanced between the three spheres that make up each product. The final appearance offers a play of transparencies and reflections and a wide choice of colors thanks to the combination of different glass and steel element finishes.

Ball Ball

Ball Ball—as the name says this is a combination of two spheres, melted together in a sophisticated mouth blown glass. Ball Ball is an elegant series of 3 glass pendants. The soft round organic edges created by the curves of the glass reflects the light and casts the shadows to the surroundings.

Designed by Michael Waltersdorff

Socket: E27, Max 40W
Cable: 200 cm transparent twisted

Dueodde Metal

A curvy shape and the contrast between metal and solid oiled oak wood gives this family of lamps a unique look. The inspiration for the design comes from the hourglass, an object of great charm whose sand was once taken from the Dueodde beach in Bornholm (Denmark).

Designed by Emanuele Patton & Michael Waltersdorff

Dueodde Glass

The original design: organic shapes and high-quality opal glass for this series consisting of three pendant lamps. Dueodde beach is one of the best beaches of Bornholm (Denmark). Its ultra-fine sand has been traditionally used in hourglasses, from where the inspiration was found.

Designed by Emanuele Patton & Michael Waltersdorff

Scandinavia

The lamps in the Scandinavia family are all made of glossy opal glass, a material that gives the lamps a very elegant and timeless look. At the same time, this material also ensures that the light provided is of high quality.

Designed by Michael Waltersdorff

Scandinavia pendant Ø20

Halo

The Halo series is the result made by a special laser technique, where the aluminium is crafted with extreme precision. The details are often seen on vintage motorbikes, from where we got our inspirations. The series comes with different combinations and colours and is truly a first mover. We recommend using our range of decorative bulbs, to get the right look as you see from the photos.

Hygge 230V range

Many of our partners have asked us to develop a 230V lamp series based on the success of the portable Hygge lamp. And we have listened to these requests and have created a complete range of lamps, extending and enriching the design behind the original concept with functional details.

Designed by Emanuele Patton & Michael Waltersdorff

Colors Hygge

"Hygge" is much more than a word for the Danes, it is a philosophy and a mindset that makes us one of the happiest countries in the world.

The Dim LED "Hygge" bulb from Colors is created from that concept and it helps remind you to find moments of joy in every day, also the busy one.

PARIS SOFT

Designed by Emanuele Patton & Michael Waltersdorff

Owner and Design Director

Michael Waltersdorff

Born in 1975 in Hellerup, Denmark, he is a self-taught Danish designer and entrepreneur. In 1994, at just 18 years old, he founded Halo Design Copenhagen.

As owner and design director, Michael continues to lead the creative vision of the brand, combining functional aesthetics with accessible innovation. His work is widely distributed across Europe.

Designer and Art Director

Emanuele Patton

Born in Trento (Italy) in 1979, he studied Industrial Design at the Polytechnic University of Milan and the Royal Danish Academy of Fine Arts in Copenhagen.

He has over 20 years of experience working with design companies across Europe. Since 2017, he has been working at Halo Design, contributing to both product design and the company's development strategy.
